

QM / DO-49-E Quality Policy

Varioprint AG is a manufacturer of printed circuit boards and a provider of related services. An essential component for long-term customer loyalty and thus the success of the company is the high, stable quality of our products as well as our services.

The customers we supply operate in sometimes very demanding segments such as the automotive, medical, aerospace or defense industries. They expect our products to function without interruption and / or to deliver the required performance on demand.

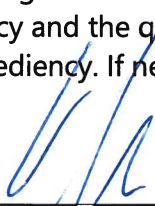

Varioprint AG has set itself the goal of meeting and, in the best case, exceeding the expectations of our customers and other interested parties in all respects. This also includes meeting the unspoken expectations of our customers to the highest degree. Our products must also comply with all safety-related, environmental, legal and regulatory requirements. We also adhere to ethical principles in all areas.

In order to achieve the set goal, Varioprint AG pursues a zero-defect policy and strives to continuously improve its own products and services as well as the company itself. In doing so, we do not make any compromises at the expense of quality, and we rely on the cooperation of everyone in our company.

All employees are responsible for the quality of their own activities and are committed to contributing to the continuous improvement process. For this purpose, Varioprint AG provides all the necessary tools, training / further education and documents that are required within the scope of their activities in order to fulfill their own responsibility and obligation.

All employees must immediately report quality problems or suspicions thereof to the relevant contact persons. They are also allowed to stop equipment and processes in obvious cases.

This quality policy replaces the previous quality policy and comes into force on 01.05.2023. The management and the quality representative have committed themselves to reviewing the quality policy and the quality objectives derived from it annually with regard to their appropriateness and expediency. If necessary, the policy will be adjusted accordingly.
